HTML, CSS, JavaScript, React, Node.js, MySQL, SQL, NoSQL, Bootstrap, Git, Object Oriented Programming, PHP, Test Driven Development, ORM, PWA, MERN, MVC Design Patterns ---- Software testing / interface design / Debugging & validation.

PROJECTS:

Just Tech News – GitHub

- This application creates the database and back-end structure for a new aggregate site called "Just Tech News", where a user can add articles, as well as comments and vote on them. Like Hacker News.
- Tools used to create this project: JavaScript ES6 -Node.js -Express.js -dotenv (npm package used to store environmental variables used in a project locally so sensitive data like root passwords are not exposed on GitHub) -MySQL -Sequelize (npm package for integrating MySQL and Node.js) -bcrypt (npm package for password hashing) -handlebars (npm package for a template engine used for html and javascript integration on the front-end)

Weather Me – GitHub

- This is a weather dashboard with form inputs that will run in the browser and feature dynamically updated HTML and CSS. It allows the user to search to view weather outlook for multiple cities so travelers can plan a trip accordingly.
- Tools used to create this project: HTML – CSS – Bootstrap – jQuery – Moment.js – Server-side API – Open weather API

EXPERIENCE:

Front-End Web Developer – UTSA – March 22 – Current

- Developed, designed, tested, and debugged applications from foundational level up to full production levels.
- Build efficient, testable, and reusable PHP modules
- Integration of data storage solutions (databases, key-value stores, blob stores, etc.)
- Enhanced applications and improved performance through testing and validations against requirements and performance standards.
- Tracked changes and merged codes from different feature to managed updated versions.

Account Executive – UPS – March 21 – Feb 22

- Developed customer relationships to meet or exceed revenue and profit goals.
- Managed website and social media presence to track leads and engage with customers.
- Negotiated terms, conditions and coverage limits and pricing with carriers and wholesalers.

Internet Sales Manager – Toyota – January 20 – Feb 21

- Established sales goals by forecasting annual sales quotas and projecting expected sales volume.
- Identified and maximized sales opportunities, increased customer retention & sales.
- Successfully managed a sales team comprised of 4 people and assisted them to meet or exceed sales quotas.

Blockchain Developer Intern – Systems 9 – May 20 – Sep 20

- Developed, prototyped, and productionized business applications using Blockchain Platforms (Hyperledger Fabric)
- Collaborated with technical team and senior level engineers to document and create artifacts.
- Performed initial client assessment and analysis to begin research process.

EDUCATION:

Irvine Valley College, California – AS Business Administration

University of Texas at San Antonio – Full Stack Web Development Certificate
